EDUCATION

Purdue University, School of Science

Indianapolis, IN

Bachelor of Science in Computer Science, Certificate in Artificial Intelligence

May 2027

- GPA: 3.76
- Relevant Coursework: Data Mine Seminar, Corporate Partners, Architecture of Computers, Data Structures, Software Design, Linear Algebra, Statistics, Mechanics, Calculus II, Operating Systems, Artificial Intelligence, Design and Implementation Of Local Area Networks, Computer Networks

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, R, JavaScript, HTML/CSS

Frameworks/Tools: React.js, Node.js, FastAPI, TailwindCSS, TensorFlow, PyTorch, Pandas, Splunk (SPL), Tableau, Power BI, Excel, AWS, Git, GCP, VMs

Skills: Machine Learning, Data Analysis, Visualization, Cloud Computing, IT Support, QuickBooks

EXPERIENCE

Software Engineering Intern

Apr 2025 – Sep 2025

Interlinked

Remote

- Built full-stack features with React, TailwindCSS, and Node.js/Express or FastAPI.
- Integrated APIs and used AWS services to improve platform reliability and performance.
- Worked with product and design teams through sprints, standups, and code reviews.

Software Engineering Intern

April 2025 – August 2025

Moblize.it

Remote

- Developed cloud-based applications on Google Cloud Platform.
- Gained hands-on experience with CRM systems and production full-stack tools.
- Collaborated with mentors to strengthen cloud and backend engineering skills.

Big Data Analyst Intern

Jan 2025 – Present

Living Stones Foundation

Remote

- Analyzing migration and donor contribution data using Python, SQL, and R.
- Served as summer team lead, coordinating task assignments, guiding interns on analytics workflows, and ensuring deliverables were completed on time.
- Building predictive models and visual dashboards in Power BI and Tableau.
- Helping to design AWS / SQL Server infrastructure for scalable analytics.

Data Scientist Researcher

Aug 2025 – Present

Rolls-Royce (via Purdue Data Mine)

Indianapolis, IN

- Analyzed large engine electronics datasets with Python to evaluate controller behavior.
- Applied signal processing to voltage/frequency sensor data to detect anomalies.
- Developed ML tools and visualizations to support controller safety testing.

Data Engineering Researcher

Aug 2024 – May 2025

Elevance Health (Anthem Inc) (via Purdue Data Mine)

Indianapolis, IN

- Built an anomaly detection system using cybersecurity and MITRE ATT&CK concepts.
- Analyzed log data with Python Pandas to identify risks and irregular activity.
- Worked in a Splunk VM environment using SPL queries to investigate alerts.

Information Technology Intern

Aug 2024 – Feb 2025

Blackmore Partners Inc

Remote

- Handled day-to-day IT issues and troubleshooting to keep internal systems running smoothly.
- Assessed existing IT infrastructure and recommended targeted improvements.
- Automated data comparison workflows using Power Automate and Power BI to improve data accuracy and support cybersecurity analysis.
